DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 & 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hisajima et al. (US Patent No. 5,275,010). Hisajima discloses an absorption chiller having a controllable capacity whereby detected conditions of the refrigerant is determined to prevent freezing within the evaporator. The claimed invention is achieved by a method whereby detecting a refrigeration demand of the absorption chiller and determining conditions in an evaporator and controlling the thermal input to a high temperature regenerator. The disclosed invention of Hisajima comprises: a first detection means for detecting refrigeration demand, a first control means for controlling a thermal output of a high temperature regenerator, an evaporator (4), a condenser (3), absorber (5), flow regulation valves (13,15), a three-way valve (16) and furthermore flow rate detection means (see column 4, lines 25-35).

Allowable Subject Matter

Claims 4-10 & 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3744

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Jones whose telephone number is (703) 305-0251. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Denise Esquivel can be reached on (703) 308-2597. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
